Summary

Final-year Computer Science student with hands-on experience building backend services and web applications using Python and Flask.

Education

B.Tech in Computer Science and Engineering, Example Institute of Technology (2022 - 2026)
CGPA: 8.4/10
Senior Secondary (CBSE), Example Public School, 91.2%

Experience

Backend Developer Intern, TechNova Solutions (Jun 2025 - Aug 2025)

- Built REST APIs in Flask for an internal inventory tool, serving 200+ daily requests.
- Reduced average API response time by 35% by adding Redis caching and query indexing.
- Wrote unit tests with pytest, raising code coverage from 40% to 78%.
- Worked on a website using React.

Projects

Student Management System

- Developed a Flask application with RESTful endpoints for managing student records, attendance and grades.
- Used SQLite with SQLAlchemy for data storage and deployed the app on Render.

Sentiment Analysis of Product Reviews

- Trained a logistic regression classifier on 50,000 reviews using scikit-learn, reaching 88% accuracy.
- Built TF-IDF features and compared them against a baseline bag-of-words model.

Skills

Languages: Python, Java, SQL, JavaScript
Frameworks: Flask, React, scikit-learn
Tools: Git, Docker, Redis, PostgreSQL

Certifications

NPTEL - Introduction to Machine Learning (Elite)
AWS Cloud Practitioner Essentials
